

# MyStudent Full Install Instructions

Before you start the install:

1. Delete any previously installed versions of MyStudent file off the C:/ drive
2. Be sure to always "Allow" on any security questions

To begin the install:

1. Create a **new folder** on your desktop named "Temp" to save the file to
2. Click this link: <http://myweber.wsdinfo.net/download/MyStudentFullInstall.exe>
3. Click "**Save As**" to save MyStudentFullInstall.exe to the Temp folder on your desktop (you may need to browse to it).
4. After the download finishes, double-click the "Temp" folder on your desktop to open it.
5. Double-click "MyStudentFullInstall" to inflate all the MyStudent files.
6. Double-click "Setup" to run the full install program (click cancel on any warnings that the program might not have installed correctly).

**Steps 5&6 may take 15 minutes or so depending on your internet connection. Please be patient.**

7. Wait for the install to complete and the log in window to open.

Once you have done the install, if the "enter" on the number pad acts as a tab in the GB instead of a return you can add this to the file:

On the C: drive in MyStudent/X\_Win95/X\_Lansa/X\_SMS/Source/Start  
Open the Start file w/ Notepad  
Insert a line after LPTH=  
and enter FLDX=N  
save
